# WWDC Roundup

Manuel @stuffmc Carrasco Molina

Hey, new MacBooks! Maybe...

Hi Siri :)

Who came up with those Coda Names, Ronald McDonald? :)

Next year it will sell out in about 1 minute 34 seconds... Objective-

Cologne might need another 2 minutes :)

Our 2nd ObjCGN

Sold out in 1 hour 43 minutes

[ΛΛ] ObjCGN.com

THE VERGE

Dream on....

Accesibility

MacBooks – 10.8 – 6

No more 17"

New MacBook Pro "non retina" –> Meeeeeh

New Air –> Fast SSD. Almost ordered a new 11"

Flash FTW! There's no way back...

Simplicity vs Blue-geekiness.

(People cheering....)

Retina != Retina ;)

Thin as the back of my Air – but yeah, thin. Then again, when you remove everything useless, it's easier. Stop adding features, people. Remove.

Bob Mansfield

@2x

iOS X!

iCloud - Notif. Center - Dictation - Share Sheet

Safari? - Power Nap - AirPlay - Game Center

Hey, iCloud has Folders!

Ladies & Gentleman: My Golden Hell, always better than a wooden paradise.

"Built in" Growl! :-)

Notification Center – Growl on the Rocks! ;-)
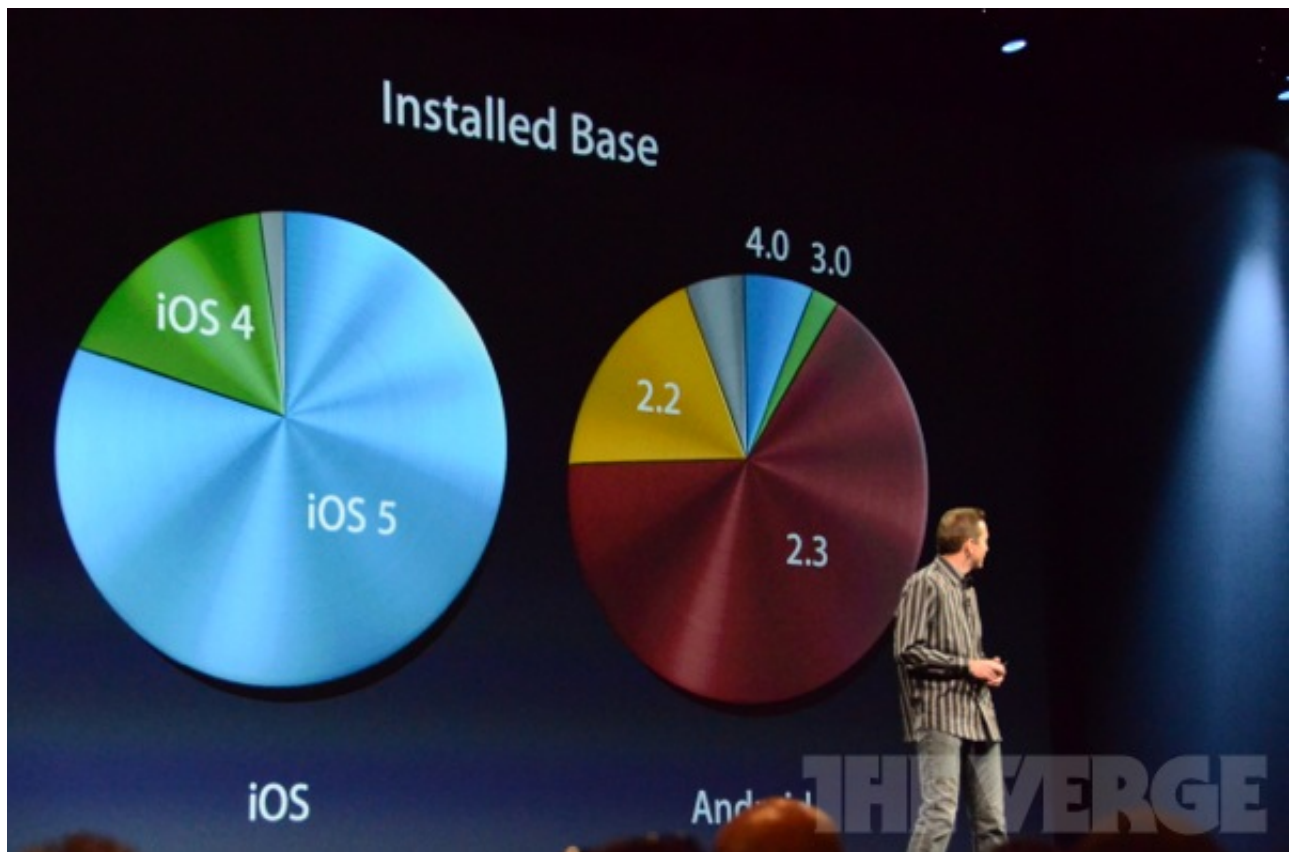

Don't beam my Life!

Power Nap

Apple TV

Game Center

July – NOW, people… 19 $…

Android 4 would be even more awesome if "some" people had that.

Siri, still no real API, besides "Launch Objective-Cologne"

Accounts.framework

Post & Tweet faster

Smart app banners

Hey, look, I also have a "real" app :-)

Passbook should be awesome. Then again, FaceTime should have been as well :)

Where's my wallet? :)

All my cards in my pocket! Just like "all my CDs" when the iPod came.

Real life simulation – vs "authentically digital"

A wallet, that's what it is!

Wait, kid, I'm gonna turn all buttons Off and *then* I'll hand you the iPad

Apple Maps – almost no changes in the API.

Look, wife, I need a new iPad ;)
